

## Alcatel 525 cable problem for UB v2.0, v3.0 or UltraLOGIC

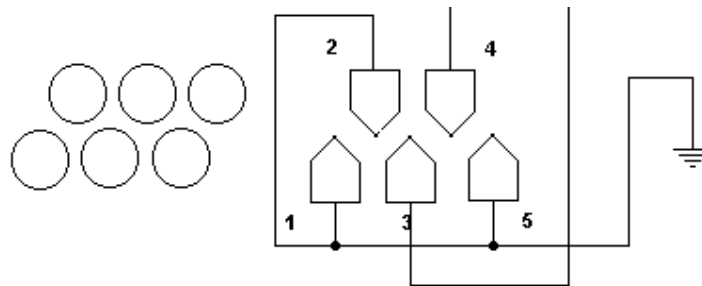

If you got problem with connection of your Box cable to our devices please do follows:

**For Universal Box v2.0, v3.0 users** – please disconnect power supply from Box to work properly with cable. If you want to work with Box using power supply (more stable work) please make simliar changes in cable as for UltraLOGIC cable.

**For UltraLOGIC box users** – please follwo to below diagram to abel to connect to phone.

Solution:

- 1) Open cable connector 525
- 2) You will found 3 wires connected – GND (connected with 3 pins), TX and RX as photo shown below:

Where:

**1,2,5 pin - GND**

**4 pin - TX**

**3 pin – RX**

All you must to do is connect 10K resistor before RX (pin 3) so cable after change will looks like below:
